Dawson Shanahan (Wales) Plant update Coronavirus

25th March 2020

To all our customers,

We are all very much aware of the global pandemic COVID-19 which is having a dramatic impact on all our lives. The UK Government recently imposed further restrictions on movement and non-essential gathering of people in all environments. This announcement has significantly changed the way in which we can operate to protect our employees, their families, our community, and our country's NHS staff.

Our plant is currently operating at reduced capacity in line with Government and H&S guidelines, we will notify you if the situation changes. We are currently shipping orders where possible; if the components we make for you need to be prioritised, please contact me as soon as possible so that we can allocate resources accordingly.

Best regards

Jeff Kiernan

Commercial Director
